Your  
journey  
starts HERE

Discover a world of opportunities

Tabuk Pharmaceuticals develops, manufactures, markets and distributes branded generic pharmaceuticals and under-licensed products globally.

Established in 1994 in Saudi Arabia, Tabuk Pharmaceuticals' fast growth has allowed it to become a global company, with a strong focus on the Middle East and North Africa region. Today, it is among the fastest growing companies in Saudi Arabia ranking third among all pharmaceutical companies.

Tabuk Pharmaceuticals offers a distinctive employee value proposition and works continuously to enhance it. We strive to become an employer of choice, to provide a culture in which employees flourish, and talents excel. We recognize the contribution of each employee by offering competitive compensation and performance-driven rewards.

Imagine what you could accomplish here.

A close-up photograph of a laboratory setting. A hand wearing a blue nitrile glove is holding a test tube, pouring a yellowish-orange liquid into a glass beaker. The beaker has volume markings at 50, 75, and 100. The background is blurred, showing other laboratory equipment and a bright light source. A semi-transparent dark grey box is overlaid on the left side of the image, containing the text "We are committed to excellence".

We are committed to excellence

As we continuously strive for excellence, we apply a “total quality policy” to all our pharmaceutical and business activities to ensure that each drug delivered meets the highest international regulatory standards.

This policy extends to encompass our culture and employee interactions. Ours is a performance driven culture where people are empowered and continually challenging themselves. They are passionate about achieving results with energy and creativity.

Our commitment to excellence is a foundational value upon which everything else rests. It is who we are.

We play as a team

We are one company, one team. Teamwork is at the heart of how we operate across business units and geographies. We believe that balancing empowerment and interdependence makes us stronger and more impactful – enabling us to achieve more collectively than any of us could individually. We are committed to a teamwork environment where every person is a valued member, treated with respect, encouraged to contribute and rewarded for his/her efforts.

We respect the individual

Tabuk Pharmaceuticals actively seeks to foster greater levels of diversity across our entire human capital. We recognize that diversity in age, nationality, gender, and background will enrich our business and enhance our ability to meet the needs of our stakeholders. Gender diversity is a key priority area.

We understand that a passionate employee is engaged in his work and will go the extra mile to succeed.

We create an atmosphere of trust, in which concerns can be fully raised as we believe in the transformative value of feedback. Employee satisfaction surveys are conducted annually to ensure that the voices of our employees are heard and incorporated in our way forward.

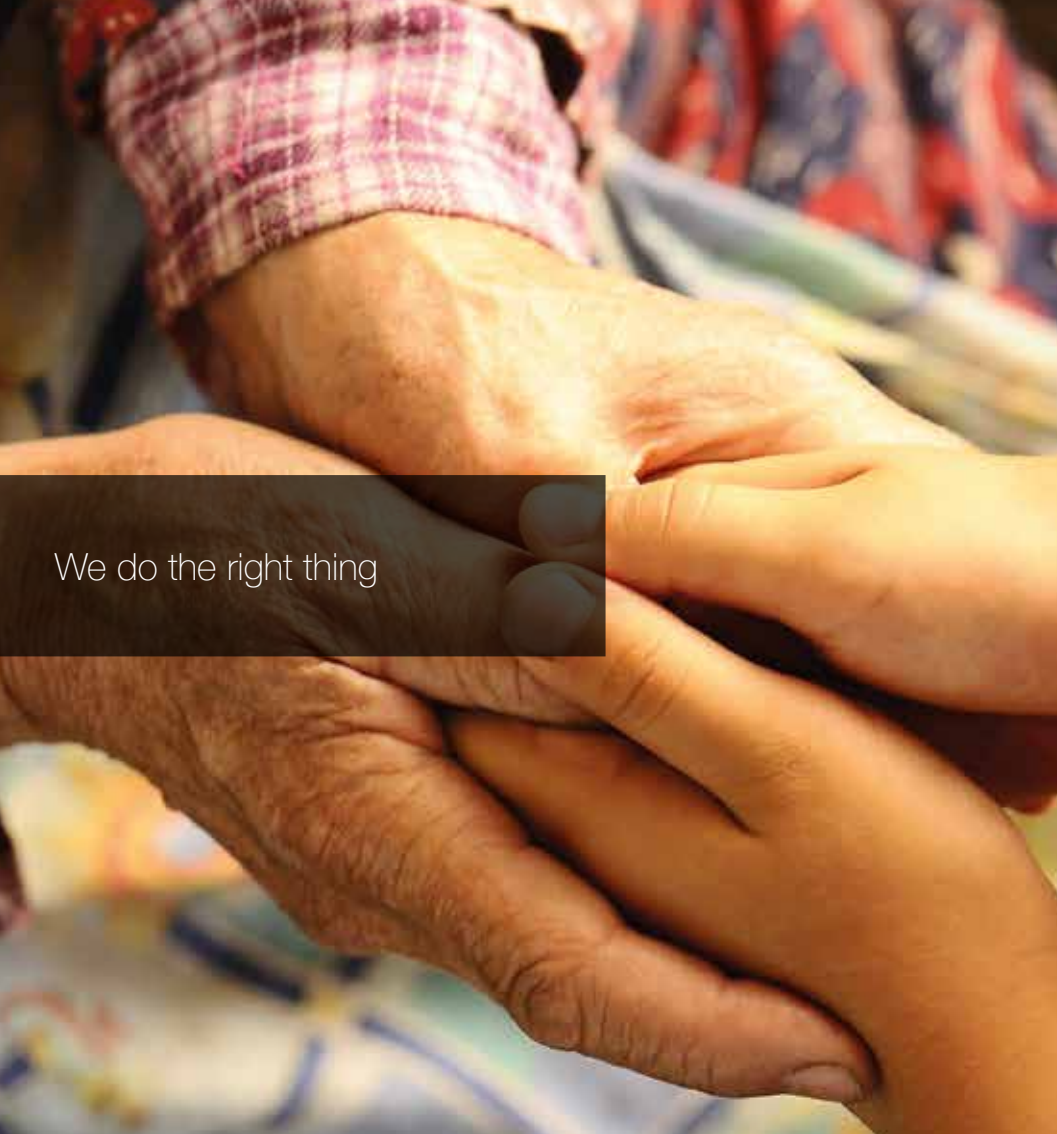

We have the humility and  
passion to learn

Tabuk Pharmaceuticals cultivates a performance driven culture, where people are learning and continually challenging themselves. We consider our employees as an integral part of the company's success and we invest in their career path.

We ensure their continued professional development through 3 key platforms – on the job learning experience, relationship-driven learning (i.e. coaching, job mentoring and continuous feedback) and tailored formal training.

Through supporting individual growth, not only are we providing a platform for our employees to achieve their professional and personal goals, but we are also developing future generations of leaders.

We do the right thing

At Tabuk Pharmaceuticals, we are committed to our patients, our people and our communities. We do the right thing at all times and in all circumstances. This requires courage.

As we touch the lives of patients, we aim to achieve this as both an ethical sustainable business and a responsible corporate citizen.

These standards are embedded throughout our organization: we act within the spirit of the laws and policies in place, we encourage each employee to pursue high performance with high integrity, we nurture a workplace of diversity and inclusion, and we partner with communities to find solutions to the health challenges of today and tomorrow.

We are always looking for talented individuals across all locations and functions to strengthen our human capital
